Pandemic Planning Exercises

Event 201
https://www.centerforhealthsecurity.org/event201/

Event 201 is a pandemic tabletop exercise hosted by The Johns Hopkins Center for Health Security in partnership with the **World Economic Forum** and the **Bill and Melinda Gates Foundation** on October 18, 2019, in New York, NY. The exercise illustrated the **pandemic preparedness** efforts needed to diminish the large-scale economic and societal consequences of a severe pandemic.

Drawing from actual events, Event 201 identifies important policy issues and preparedness challenges that could be solved with sufficient political will and attention. These issues were designed in a narrative to engage and educate the participants and the audience.

There Was Not A High Consequence Infectious Disease (UK)

High consequence infectious diseases (HCID) UK March 19th 2020(Archive captured January 2nd 2021)
https://web.archive.org/web/20210102120235/https://www.gov.uk/guidance/high-consequence-infectious-diseases-hcid

“As of 19 March 2020, COVID-19 is no longer considered to be a high consequence infectious disease (HCID) in the UK.”

“The 4 nations public health HCID group made an interim recommendation in January 2020 to classify COVID-19 as an HCID. This was based on consideration of the UK HCID criteria about the virus and the disease with information available during the early stages of the outbreak. Now that more is known about COVID-19, the public health bodies in the UK have reviewed the most up to date information about COVID-19 against the UK HCID criteria. They have determined that several features have now changed; in particular, more information is available about mortality rates (low overall), and there is now greater clinical awareness and a specific and sensitive laboratory test, the availability of which continues to increase.”

“The Advisory Committee on Dangerous Pathogens (ACDP) is also of the opinion that COVID-19 should no longer be classified as an HCID.”

Propaganda speech by Boris Johnson

"Covid-19 (SARS-COV-2)" Testing

They are using RT – PCR

- Guidance and standard operating procedure : COVID-19 virus testing in NHS laboratories
  https://web.archive.org/web/20210105132919/https://www.england.nhs.uk/coronavirus/wp-content/uploads/sites/52/2020/03/guidance-and-sop-covid-19-virus-testing-in-nhs-laboratories-v1.pdf

  "The preferred screening/testing is molecular diagnosis of COVID-19 using real-time RT-PCR (RdRp gene) assay based on oral swabs, which PHE laboratories have been using to confirm this disease." Page 2
- CDC 2019-Novel Coronavirus (2019-nCoV) Real-Time RT-PCR Diagnostic Panel
  https://www.fda.gov/media/134922/download

  "The CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel is a molecular in vitro diagnostic test that aids in the detection and diagnosis 2019-nCoV and is based on widely used nucleic acid amplification technology. The product contains oligonucleotide primers and dual-labeled hydrolysis probes (TaqMan®) and control material used in rRT-PCR for the in vitro qualitative detection of 2019-nCoV RNA in respiratory specimens." Page 2

How RT - PCR Works

- Dr. Thomas Cowan: How the RT-PCR Covid-19 Test Works
  - https://www.youtube.com/watch?v=Ho0cdFifrYE

RT- PCR can not be used to test for infectious diseases

- Kary Mullis, inventor of the PCR Test, Santa Monica 12 July 1997

“PCR test doesn’t tell you that you are sick, or that the thing that you ended up with was going to hurt you or anything like that”

“with PCR if you do it well you can find almost anything in anybody.”

“the PCR test is a process that it's used to make a lot of something out of something, it DOESN'T tell you that you are sick, it doesn't tell you that the thing you've ended up with it really was gonna hurt you"…

https://archive.org/details/corporate-greed-aids-part-2 (PART 2. ---Start at 48:37)

What does the government health bodies have to say about RT - PCR

- Understanding cycle threshold (Ct) in SARS-CoV-2 RT-PC https://web.archive.org/web/20220610085035/https://www.gov.uk/government/publications/cycle-threshold-ct-in-sars-cov-2-rt-pcr
- “RT-PCR detects presence of viral genetic material in a sample but is not able to distinguish whether infectious virus is present.”* Page 6 https://web.archive.org/web/20201030153927/https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/926410/Understanding_Cycle_Threshold__Ct__in_SARS-CoV-2_RT-PCR_.pdf

- Fact Sheet for Patients, Centers for Disease Control and Prevention (CDC) CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel
  https://web.archive.org/web/20200305042430/https://www.cdc.gov/coronavirus/2019-ncov/downloads/Factsheet-for-Patients-2019-nCoV.pdf

  "What does it mean if I have a positive 2019-nCoV test result?
  If you have a positive test result, it is very likely that you have COVID-19. Therefore, it is also likely that you may be placed in isolation to avoid spreading the virus to others."

  "What does it mean if I have a negative test result?
  A negative test result means that the virus that causes COVID-19 was not found in your sample. However, it is possible for this test to give a negative result that is incorrect (false negative) in some people with COVID-19. You might test negative if the sample was collected early during your infection. You could also be exposed to COVID-19 after your sample was collected and then have become infected. This means that you could possibly still have COVID-19 even though the test result is negative. If your test is negative, your healthcare provider will consider the test result together with all other aspects of your medical history (such as symptoms, possible exposures, and geographical location of places you have recently traveled) in deciding how to care for you."

  "Is this test FDA-approved or cleared?
  No. This test is not yet approved or cleared by the United States FDA. When there are

no FDA-approved or cleared tests available, and other criteria are met, FDA can make tests available under an emergency access mechanism called an Emergency Use Authorization (EUA). The EUA for this test is supported by the Secretary of Health and Human Service's (HHS's) declaration that circumstances exist to justify the emergency use of in vitro diagnostics for the detection and/or diagnosis of the virus that causes COVID-19. This EUA will remain in effect (meaning this test can be used) for the duration of the COVID-19 declaration justifying emergency of IVDs, unless it is terminated or revoked by FDA (after which the test may no longer be used)."

- RT - PCR Cycles of Amplification

  Guidance and standard operating procedure : COVID-19 virus testing in NHS laboratories.https://web.archive.org/web/20210105132919/https://www.england.nhs.uk/coronavirus/wp-content/uploads/sites/52/2020/03/guidance-and-sop-covid-19-virus-testing-in-nhs-laboratories-v1.pdf

  "45X Cycles" (page 22)

  Fauci The Criminal Himself Admits Covid PCR Test at Over 35 Cycles Is Deceitful, Worse Than Useless. (TWiV 641: COVID-19 with Dr. Anthony Fauci (4:28)) https://youtu.be/a_Vy6fgaBPE?t=268

  "…If you get a cycle threshold of 35 or more…the chances of it being replication-competent are miniscule… you almost never can culture virus from a 37 threshold cycle…even 36…it's just dead nucleoids, period."

- WHO (finally) admits PCR tests create false positives
  https://off-guardian.org/2020/12/18/who-finally-admits-pcr-tests-create-false-positives/

  "The "gold standard" Sars-Cov-2 tests are based on polymerase chain reaction (PCR). PCR works by taking nucleotides – tiny fragments of DNA or RNA – and replicating them until they become something large enough to identify. The replication is done in cycles, with each cycle doubling the amount of genetic material. The number of cycles it takes to produce something identifiable is known as the "cycle threshold" or "CT value". The higher the CT value, the less likely you are to be detecting anything significant. Dr Kary Mullis, who won the Nobel Prize for inventing the PCR process, was clear that it wasn't meant as a diagnostic tool, saying: with PCR, if you do it well, you can find almost anything in anybody."

  And, commenting on cycle thresholds, once said:

  "If you have to go more than 40 cycles to amplify a single-copy gene, there is something seriously wrong with your PCR."

Cases & Death

Protocol for determine cause of death (2020 - onwards)

- Guidance for doctors completing Medical Certificates of Cause of Death in England and Wales (FOR USE DURING THE EMERGENCY PERIOD ONLY)
  https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/877302/guidance-for-doctors-completing-medical-certificates-of-cause-of-death-covid-19.pdf

  https://web.archive.org/web/20210817064131/https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/877302/guidance-for-doctors-completing-medical-certificates-of-cause-of-death-covid-19.pdf

  Location of PDF
  https://web.archive.org/web/20210809010006/https://www.gov.uk/government/publications/guidance-notes-for-completing-a-medical-certificate-of-cause-of-death

  "In an emergency period of the COVID-19 pandemic there is a relaxation of previous legislation concerning completion of the medical certificate cause of death (MCCD) by medical practitioners (referred to for the remainder of this document as doctor). The important changes occur in Sections 2 and 3 of this guidance. You should use standard guidance outside of the emergency period." Page 1

  "3. Referring deaths to the coroner

  - *Covid-19 is an acceptable direct or underlying cause of death for the purposes of completing the Medical Certificate of Cause of Death*
  - *Covid-19 is not a reason on its own to refer a death to a coroner under the Coroners and Justice Act 2009.*
  - *That Covid-19 is a notifiable disease under the Health Protection (Notification) Regulations 2010 does not mean referral to a coroner is required by virtue of its notifiable status."* Page 3

  "For example, if before death the patient had symptoms typical of COVID-19 infection, but the test result has not been received, it would be satisfactory to give 'COVID-19' as the cause of death, tick Box B and then share the test result when itbecomes available. In the circumstances of there being no swab, it is satisfactory to apply clinical judgement." Page 3

- New ICD code introduced for COVID-19 deaths (CDC)
  https://www.cdc.gov/nchs/data/nvss/coronavirus/Alert-2-New-ICD-code-introduced-for-COVID-19-deaths.pdf

  https://web.archive.org/web/20200405175956/https://www.cdc.gov/nchs/data/nvss/coronavirus/Alert-2-New-ICD-code-introduced-for-COVID-19-deaths.pdf

  "Will COVID-19 be the underlying cause?
  The underlying cause depends upon what and where conditions are reported on the death certificate. However, the rules for coding and selection of the underlying cause of death are expected to result in COVID-19 being the underlying cause more often than not."…….
  *"Should "COVID-19" be reported on the death certificate only with a confirmed test?***
  COVID-19 should be reported on the death certificate for all decedents where the disease caused or is assumed to have causedor contributed to death."*

The “Vaccine” Is An Experimental Injection Under Emergency Use

- What is an Emergency Use Authorization (EUA)?
  https://www.fda.gov/vaccines-blood-biologics/vaccines/emergency-use-authorization-vaccines-explained

  “An Emergency Use Authorization (EUA) is a mechanism to facilitate the availability and use of medical countermeasures, including vaccines, during public health emergencies, such as the current COVID-19 pandemic. Under an EUA, FDA may allow the use of unapproved medical products, or unapproved uses of approved medical products in an emergency to diagnose, treat, or prevent serious or life-threatening diseases or conditions when certain statutory criteria have been met, including that there are no adequate, approved, and available alternatives.“

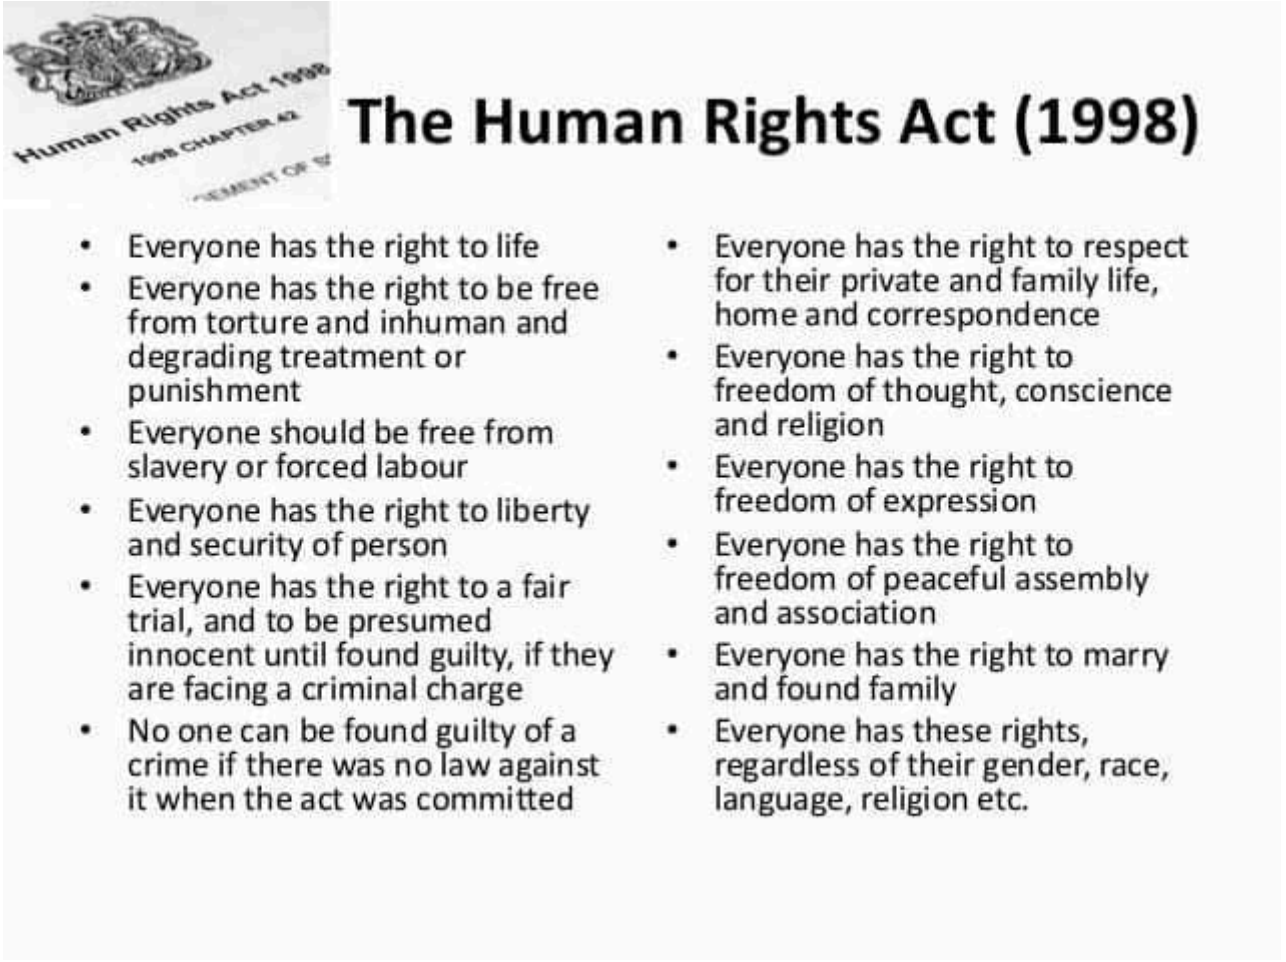
Human Rights and Violations

The Human Rights Act 1998(UK)



Human Rights Act 1998
1998 CHAPTER 42
The Human Rights Act (1998)
Everyone has the right to life
Everyone has the right to be free from torture and inhuman and degrading treatment or punishment
Everyone should be free from slavery or forced labour
Everyone has the right to liberty and security of person
Everyone has the right to a fair trial, and to be presumed innocent until found guilty, if they are facing a criminal charge
No one can be found guilty of a crime if there was no law against it when the act was committed
Everyone has the right to respect for their private and family life, home and correspondence
Everyone has the right to freedom of thought, conscience and religion
Everyone has the right to freedom of expression
Everyone has the right to freedom of peaceful assembly and association
Everyone has the right to marry and found family
Everyone has these rights, regardless of their gender, race, language, religion etc.

https://www.legislation.gov.uk/ukpga/1998/42/contents

- **The Nuremberg Code (1947)**

http://www.cirp.org/library/ethics/nuremberg/

“The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision.”

“The experiment should be so conducted as to avoid all unnecessary physical and mental suffering and injury.”

“The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the experiment.”
“During the course of the experiment the scientist in charge must be prepared to terminate the experiment at any stage, if he has probable cause to believe, in the exercise of the good faith, superior skill and careful judgment required of him, that a continuation of the experiment is likely to result in injury, disability, or death to the experimental subject.”

- Human Rights Violations in Healthcare Provision in Developing Countries and the Effectiveness of Current Measures: "Since the early 2000s, the Global Alliance for Vaccines and Immunizations (Gavi), Global Health Innovative Technology Fund and PATH, all heavily funded by the Gates Foundation, have been distributing vaccines and drugs to vulnerable populations in Africa and India. In 2010, the Gates Foundation funded experimental malaria and meningitis vaccine trials across Africa and HPV vaccine programs in India. All of theseprograms resulted in numerous deaths and injuries, with accounts of forced vaccinations and uninformed consent. Ultimately, these health campaigns, under the guise of saving lives, have relocated large scale clinical trials of untested or unapproved drugs to developing markets where administering drugs is less regulated and cheaper."
